DETAILED ACTION

1. Claim 33 is presented for examination. Claims 1-32 are canceled.
2. The IDS submitted on 2/6/2004 and 4/16/2004 are considered.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Harry Smith, Reg. No. 32,493, on June 10, 2008.

4. The application has been amended as follows:

1-32. Cancelled

33. (Currently Amended) A method for execution in a policy management system, comprising:

dynamically introducing a new attribute into a policy for the policy-managed system, without requiring a change to a policy manager, by executing steps that comprise

operating at least one sensor coupled to the policy-managed system to dynamically discover a value of at least one existing metric;

associating a new attribute with the discovered value of the at least one existing metric;

incorporating the new attribute into a policy; and

storing the policy for future use,

where operating further comprises determining if the new attribute is directly measurable by the at least one sensor, and if it is not, determining if a definition of the new attribute currently exists and if it does, determining from the new attribute definition the identity of at least one metric having a metric value required to determine ~~the attribute value~~ a value of the new attribute, obtaining the metric value of the at least one required metric from a corresponding one of the sensors, and determining the value of the new attribute from the obtained at least one metric value, where the attribute definition comprises at least one of a formula specified by a user and a method that determines the value of the new attribute from existing information, ~~and where the new attribute is one of a directly discoverable entity or an entity that is not directly discoverable.~~

5. The following is an examiner's statement of reasons for allowance: None of the prior art of the record explicitly teaches or fairly suggested all of the claimed limitations, especially the limitation of determining if the new attribute is directly measurable by the sensor, and if it is not, determining if a definition of the new attribute currently exists and if it does, determining from the new attribute definition the identity of a metric having a metric value required to determine a value of the new attribute, obtaining the metric value from a corresponding one of the sensors,

Art Unit: 2152

and determining the value of the new attribute from the obtained metric value, where the attribute definition comprises at least one of a formula specified by a user and a method that determines the value of the new attribute from existing information.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
